

SV102 + SV146 + SV147

VALTRA TRACTORS

The Valtra tractor is model T121 producing 160hp. With PTO drive from front and back, it can also be used in reverse drive mode to enable operations from the tractor in both directions ensuring all round visibility.

Mulching operations are carried out using a rear mounted PTO driven Noremat 7.3 metre reach mulcher with 18no double sided cutting hammers. The cutting drum can rotate in both directions enabling mulching operations when driving in forward or reverse.

Chipping operations are carried out using a front mounted PTO driven 16 x14 Vandaele Chipper. The chipper processes timber using 3no multi tooth blades mounted on a flywheel which consists of 8no individual teeth per blade. The individual cutting teeth are carbium tipped ensuring long life and optimum cutting performance.

The base Valtra tractor is model T121 producing 160hp. With PTO drive from front and back, it can also be used in reverse drive mode to enable operations from the tractor in both directions ensuring all round visibility.

WEIGHT:	12000kg
GAUGE:	W6A
RAIL TYPE:	9B
MAX ON/OFF TRACKING CANT:	100mm
MAX WORKING CANT:	150mm
MAX TRAVELLING CANT:	200mm
MAX REACH:	7.3m
ALO CAPABLE:	Yes
TRAVEL UNDER LIVE:	Yes
WORK UNDER LIVE:	No
